Ten Spot Keno Rules

- Based on the popular lottery-like gambling game played at casinos or by states lotteries
- In general Keno, balls are numbered 1 to 80
- In “Ten Spot Keno”, each players selects anywhere from 1 to 10 balls, then makes a wager on how many will be randomly selected
- The “Ten Spot Keno” earnings payout table, based on winning probabilities, is shown later
- Twenty (20) balls are then randomly selected
- Table with players’ earnings/losses is updated

Ten Spot Keno Rules, cont.

- Required: Keno sheets or paper, and pencil
- During each round of “Ten Spot Keno”:
 1. Each player circles or writes down 1 to 10 numbers between 1 and 80
 2. Each player states wager **AND** # of balls playing
 3. Twenty (20) winning balls are then displayed
 4. Each player states # of balls correctly selected
 5. Players earnings/losses table is updated
- Everyone allowed to play
- Game ends after a designated period of time, number of rounds played, or level of losses

Ten Spot Keno Earnings/Losses

6	13	17	18
